CRITICAL FINDINGS

26

Open high/critical

Key observations

- 1 vendor currently sits in high or critical residual risk.
- 26 critical or high findings remain open.
- 1 remediation item is past the target date.

Risk trend: insufficient history

Insufficient persisted score history to establish a board-level trend. The figure will appear once two score periods exist.

Decisions and actions required

- Complete 11 overdue vendor assessment(s).
- Remediate or formally accept 26 critical/high finding(s).
- Escalate 1 overdue remediation item(s).
- Review decision briefs for 1 vendor(s) with HIGH or CRITICAL residual risk.

How this report is organized

- Page 2 — Portfolio risk heatmap, residual distribution, and concentration.
- Page 3 — Findings severity, overdue remediation, aging, and control effectiveness.
- Page 4 — Monitoring coverage, score movement, and expiring evidence.
- Page 5 — Recorded decisions, acceptances, recommendations, and upcoming reviews.

PAGE 2

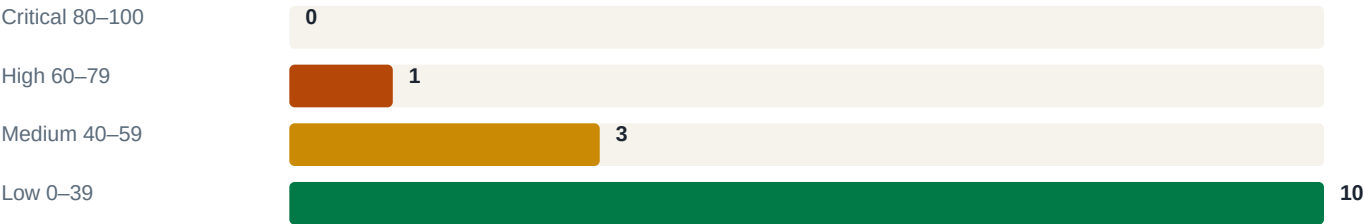

Portfolio risk

5×5 residual risk heatmap

LIKELIHOOD !' · Derived from persisted residual score and vendor criticality. Cell value is vendor count.

Residual risk distribution

VENDOR	SERVICE	CRITICALITY	RESIDUAL	BAND
Suprew	Technology	Critical	74	High
Phase C golden 1789361629	Payroll processing	High	58	Medium
Phase C golden 1789360695	Payroll processing	High	58	Medium
Microsoft In	Technology	Critical	40	Medium
Phase C cross 1789361629	Payroll processing	High	31	Low
Phase A Payroll 1789351850	Payroll processing for employees	High	31	Low

VENDOR	SERVICE	CRITICALITY	RESIDUAL	BAND
Phase C cross 1789360695	Payroll processing	High	31	Low
Phase C reject 1789361629	Payroll processing	High	31	Low

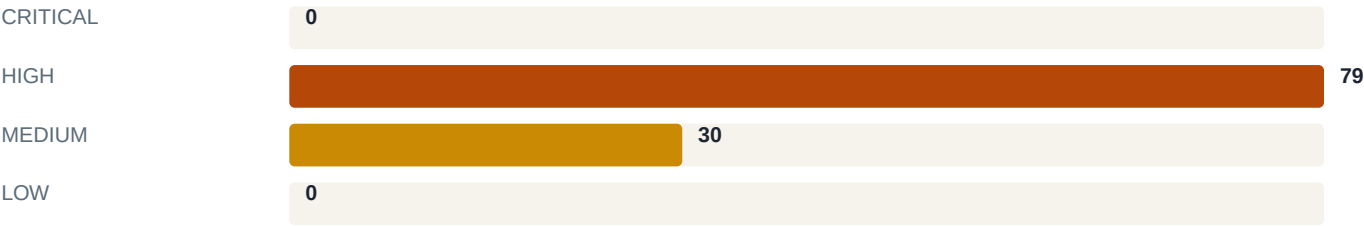

Concentration

- Other: 12 vendors
- Technology: 2 vendors

PAGE 3

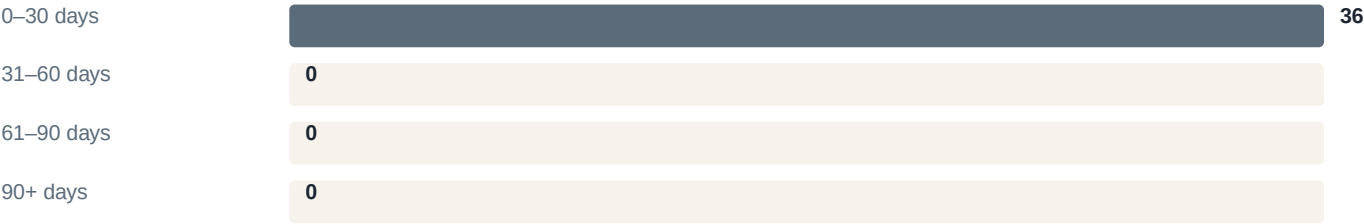

Remediation and control posture

Findings by severity

VENDOR	FINDING	SEVERITY	TARGET DATE
Supreme Investigation	Private-beta MFA evidence gap	High	2026-09-12

Remediation aging

Control effectiveness

Average persisted control effectiveness across recent score calculations is 59. Residual risk is reduced only by scored controls, not by risk acceptance.

PAGE 4

Monitoring and change

PROVIDER Not set	VENDORS MONITORED 0 With recorded signals	SIGNALS THIS PERIOD 0	ACTION REQUIRED 0
--	--	---	---

External monitoring not configured

Provider health is independent of signal count. Supreme does not invent monitoring events.

No recorded monitoring signals

This panel stays empty until a provider writes VendorMonitoring events. Historical or simulated ratings are not shown.

Residual scores increased for 3 vendors and decreased for 2.

No evidence expiring

No stored evidence is due to expire in the next 45 days.
